Eduardo Fertig Bastos

Full Stack Developer

I have 5 years of experience and a bachelor's degree in Information Systems from UNIDAVI. My expertise lies in back-end development using Node.js, Laravel, and PHP. On the front-end, I have experience with Next.js, React, Vue, JavaScript, JQuery, and React Native. Regarding databases, I have worked with both relational (PostgreSQL, MySQL and SQL-Server) and non-relational (MongoDB) models.

WORK EXPERIENCE

Javascript Engineer
Intellective

04/2023 - Present　　　　　　　　　　*California, Mountain View, Remote*
Development of applications for ServiceNow. Creation of applications using Vue.js with TypeScript and also using the Vuetify library. Maintenance of applications and plugins built with JavaScript. Refactoring of a product built in JavaScript to Vue with TypeScript. Creation of responsive newsletter templates for different email platforms. Use of a Monorepo, with PNPM. Creation and building of SCSS, as well as the use of Tailwind. Integration with the ChatGPT API. Use of Agile methods such as SCRUM to structure and manage the project. Use of Jira for task tracking. Microsoft Teams for communication. GitHub for repositories and actions.

Skills

JavaScript - TypeScript - Vue.js - Vuetify - Service Now - HTML - CSS - Tailwind - SCSS - Newsletter - API - ChatGPT

Full Stack Developer
Anonymous Internal Assesment System

01/2023 - 12/2023　　　　　　　　　　　　　　　　　*Remote*
Developed an internal evaluation system using Next.js and React for the front-end, employing Server-Side Render. Utilized Node.js for the backend, with Prisma as the ORM and Zod for data validations. PostgreSQL was used as database. The front-end was build with Next.js. Created a dynamic form with registered questions and enabled the creation of multiple applications for group-specific responses. Implemented email notifications with links for the application and after the answers, the user id is hashed with some other information so it can ensure anonymity and prevent duplicate responses.Designed a dashboard with a calendar for visualizing scheduled applications and graphs displaying responses. Streamlined member participation and enhanced user experience.

Skills

Next.js - React JS - Node.js - JavaScript - TypeScript - HTML - CSS - Styled Components - Material UI - Zod - PostgreSQL - Docker

Full Stack Developer
Points for special diet people

08/2021 - 01/2023　　　　　　　　　　　　　　　　　*Remote*
Web application built using React JS and an API built with Node.js , both with Typescript. The platform helps people with dietary restrictions to find suitable establishments and products. Establishments can register, including location and product categories. The map shows nearby establishments. Filter function helps users to find suitable products by saving the selection in local memory. The project uses advanced technologies like React JS and Node.js for good performance and code quality. The platform is user-friendly and offers an efficient solution for those with dietary restrictions. The app's features make it a valuable tool for people looking for suitable food products.

Skills

Node.js - Express - React JS - JavaScript - TypeScript - HTML - CSS - Styled Components - Material UI - PostgreSQL - Docker - AWS

Full Stack Developer
ByNani

03/2020 - 07/2020　　　　　　　　　　　　　　*Rio do Sul, SC, Brazil*
TThe felt doll selling website offers a unique and authentic look at the products through the "Discover the Art" section. Customers can customize their orders and efficiently communicate with the seller through the updated contact form. The website was built using Laravel to have a robust black-end and the front-end built using blade allowed the provision of a platform that offers an intuitive and efficient shopping experience.

Skills

Laravel - PHP - POO - HTML - CSS - Javascript - JQuery - PostgreSQL - Docker - Bootstrap

Full Stack Developer
JVS Sistemas

03/2021 - 05/2022　　　　　　　　　　　　　　*Rio do Sul, SC, Brazil*
A small company that handles a wide variety of different types of customers. I worked in the maintenance and development of several systems, such as the main project of the company, which was OMNI. Which is a project built in Laravel combined with Jquery to handle the javascript on the front end and using Postgres as the database. Omni's idea was to become the company's main system, since the old one was more like legacy code. I was one of the main developers of this system. The system was designed to be highly automated. I worked on the automation of validation rules through the model, use of masks in the front and their treatment in the back. Several components were created, the most different being a tree based on the Jtree library with extreme customization.

Skills

Laravel - PHP - OOP - HTML - CSS - Javascript - JQuery - PostgreSQL - Angular - TypeScript - Electron - Python - Java - SQLite - SQL Server - Docker - MongoDB

EDUCATION

Bachelor of Information Systems
UNIDAVI - Centro Universitário para o Desenvolvido do Alto Vale do Itajaí
01/2019 - 12/2022　　　　　　　　　　　　　*Rio do Sul, SC, Brazil*

Ignite React JS | Node.js
Rocketseat

03/2022 - 03/2024　　　　　　　　　　　　　　　　　*Remote*

SKILLS

JavaScript　TypeScript　Next.JS　React JS

Vue 3　React Native　Node.js　Laravel　PHP

PostgreSQL　SQL　MongoDB　HTML　CSS

Bootstrap　Tailwhind　Material UI　AWS　API

Docker　Monorepo　Github　Jira　Scrum
