Eduardo Fertig Bastos

Software Engineer

Software Engineer with 7 years of experience building scalable, high-performance web applications — currently focused on frontend development with React, Next.js, and TypeScript in a global e-commerce environment. At Trafilea, I work on storefronts serving users across 10+ countries, contributing to internationalization, Core Web Vitals improvements, and subscription features that impact customer retention. My stack spans Next.js, React, Vue, Node.js, NestJS, and PostgreSQL.

WORK EXPERIENCE

Software Engineer
Trafilea

04/2024 - Present *Montevideo, Uruguay, Remote*

• Developed and optimized e-commerce frontend components using Next.js (v14), TypeScript, and SSR — including Product Detail Page elements (color/size selectors, image galleries) and credit-related flows, improving performance, SEO, and scalability across high-traffic storefronts.
• Contributed to and maintained the Afrodita design system, building reusable components that ensured UI consistency and accelerated development across teams.
• Contributed to the modularization of the frontend monorepo into reusable submodules, reducing code duplication and improving maintainability.
• Implemented A/B tests to support data-driven decisions and conversion rate optimization.
• Contributed to i18n for Shapermint, implementing support for English, Spanish, and French across international markets.
• Monitored and improved Core Web Vitals (LCP, INP, CLS) using Datadog, proactively detecting and resolving production performance issues.
• Delivered subscription features (Autoship and Club programs), contributing to customer retention and recurring revenue.
• Implemented unit tests with Jest and supported incident response via PagerDuty to maintain production reliability.
• Participated actively in cross-functional discussions with Product, Design, and Business stakeholders, contributing technical perspective during planning and shaping frontend decisions that aligned with broader product strategy.

Skills

JavaScript - TypeScript - Next.js - React - HTML - CSS - Styled Components - NestJS - API - Cursor - Scrum

Senior Software Engineer
Intellective

04/2023 - 03/2024 *Mountain View, California, Remote*

• Built and maintained Vue.js + TypeScript applications for ServiceNow, improving business process automation and operational efficiency.
• Led creation of a PNPM monorepo enabling code sharing and reuse across company projects, significantly reducing duplication.
• Refactored a legacy vanilla JavaScript codebase to Vue + TypeScript, improving maintainability, scalability, and enabling faster feature delivery.
• Integrated the ChatGPT API to add intelligent, personalized user interactions — expanding platform capabilities with natural language processing.
• Standardized project styling with Tailwind and SCSS, improving design consistency and developer collaboration.
• Conducted technical interviews for frontend developer candidates, evaluating JavaScript fundamentals and problem-solving ability.

Skills

JavaScript - TypeScript - Vue.js - Vuetify - Service Now - HTML - CSS - Tailwind - SCSS - Newsletter - API - ChatGPT - Scrum

Software Engineer
Anonymous Internal Assesment System

01/2023 - 12/2023 *Remote*

• Led end-to-end development of an anonymous internal evaluation system — including form creation, dashboard with calendar visualization, and response analytics.
• Built a RESTful API with Node.js following SOLID principles and DDD, structured into Controllers, Services, Repositories, and Validators.
• Implemented security measures including data validation, prevention of duplicate submissions, and secure form link distribution via email.
• Used Next.js with SSR for SEO optimization and React with Material UI for a dynamic, user-friendly interface.
• Containerized with Docker and deployed with PostgreSQL + Prisma ORM; covered with Jest unit and end-to-end tests.

Skills

Next.js - React JS - Node.js - JavaScript - TypeScript - HTML - CSS - Styled Components - Material UI - Zod - PostgreSQL - Docker - DDD - Scrum - Unit Tests

WORK EXPERIENCE

Software Engineer
Points for special diet people
08/2021 - 01/2023 *Remote*

• Led development of a web application helping people with dietary restrictions (celiac, lactose intolerant) find compatible local establishments and products.
• Built full-stack with React, Node.js, PostgreSQL, Prisma, and AWS S3 — applying DDD and SOLID principles for scalable architecture.
• Implemented robust error handling and a user-friendly interface with Material UI, ensuring a seamless experience across user types.

Skills
Node.js - Express - React JS - JavaScript - TypeScript - HTML - CSS - Styled Components - Material UI - PostgreSQL - Docker - DDD - AWS - Scrum - Unit Tests

Software Engineer
JVS Sistemas
11/2020 - 05/2022 *Rio do Sul, SC, Brazil*

• Played a key role in developing a Laravel-based system to replace the company's legacy system, focusing on automation and efficiency.
• Customized components, including a Tree component based on Jstree for data visualization and manipulation.
• Data modeling and index creation. Handled Systems with PostgreSQL, SQLite, MongoDB and SQLServer.
• Instructed and trained new juniors who joined the company.
• Utilized Scrum with user stories for effective communication with the client, ensuring project deliverables met their expectations.
• Performed maintenance and added new features to several systems builts on Electron and Python, Java, Pure PHP, Angular with Typescript and PHP, React and Node, and on React Native.

Skills
Laravel - PHP - OOP - HTML - CSS - Javascript - JQuery - PostgreSQL - Angular - TypeScript - Python - Java - SQLite - SQL Server - Docker - MongoDB - React Native - AWS - Unit Tests

Software Engineer
Psychology Clinic System
06/2021 - 12/2021 *Rio do Sul, SC, Brazil*

• Built a web application for a psychology clinic to manage consultations, diagnoses, and reports — with calendar visualization and data dashboards improving daily workflow.
• Developed a RESTful API using Laravel following SOLID principles, with layered architecture (Controllers, Services, Repositories, Validators).
• Applied DDD for domain modeling and containerized deployment with Docker + PostgreSQL.

Skills
Laravel - PHP - OOP - HTML - CSS - Javascript - JQuery - Bootstrap - PostgreSQL - Docker - DDD - Scrum

Software Engineer
ByNani
01/2020 - 10/2020 *Rio do Sul, SC, Brazil*

• Built a web application for a felt doll artist that drove a 300% increase in sales by expanding her online presence and enabling custom order requests.
• Developed end-to-end with Laravel, PHP, PostgreSQL, and Docker — applying DDD principles for domain analysis and business rule modeling.
• Delivered a unique product showcase ("Meet the Art" section) and a streamlined contact form that improved customer communication and conversion.

Skills
Laravel - PHP - OOP - HTML - CSS - Javascript - JQuery - Bootstrap - PostgreSQL - Docker - DDD - Scrum - AWS

EDUCATION

Bachelor of Information Systems
UNIDAVI - Centro Universitário para o Desenvolvido do Alto Vale do Itajaí
01/2019 - 12/2022 *Rio do Sul, SC, Brazil*

Ignite React JS | Node.js
Rocketseat
03/2022 - 03/2024 *Remote*

SKILLS

JavaScript, TypeScript, Next.JS, React JS, Vue 3, React Native, Node.js, Laravel, PHP, PostgreSQL, SQL, MongoDB, HTML, CSS, Tailwhind, Unit Tests, Material UI, AWS, API, Docker, Monorepo, Github, Jira, Scrum
